

I am a Indiana citizen that supports our state "Do Not Call List" law. I have found it to be very effective, and worry about less protection if our EFFECTIVE and VERY POPULAR state law is susperceeded by a federal law. It seems highly likely these banks are requesting this mesure becuase they obviously see more business opportunities under the federal list opposed to the state list. The only way that could happen is if the do not call rules are relaxed, meaning I will get more calls. Leave our state "Do Not Call" intact. Hoosiers support it, so should you.
